6. Additional comments:

My company produces wallpapers in virtue of customised visualization used LATEX technology.
The raw material we deal at European trade companies so far.
Now we are searching direct manufacturers in your country which could produce for us digital raw material in roll.
We are interested in PVC, PVC free, Non-Woven, Textile, etc materials but important their suitability for LATEX printing !

If you are producer of digital raw materials and you are interested in common fruitful business, please send me your quotation of your productions.
