Hungarian technologies and project opportunities

Date: 2020.03.06

1. Short description of technology/collaboration opportunity:

Paper pallet folding patent (India, China, Eurasia, EU, USA, Canada) /
Paper pallet production line technology (mechanical and electrical blueprints,
assembly documents and control software)
We offer both products for sale.

2. Detailed description:

GGP Ltd has a unique fold design patent that can be a potentially successful product on a constantly growing market. We have developed a production line technology for paper pallets that provides further development opportunities in the long term. Our company is a start-up company, whose goal was to create technology. Now we would like to place it into the hands of professional investors who can make a great success with it.
